

I am a concerned citizen that loves radio. I like having a place where I can gather many different points of view, and discover different kinds of music.

If you define local programming then it should be the entire locality. All local events and artists should then be part of the broadcast.

All local activities count.

voice tracking should be banned. It's misleading to the audience.

Playlists are to radio what the blacklist was to television. It's censorship. The point is to give all artists a chance, and not just the "chosen few".

Thank you for considering this issue, and let's keep the public airways public.
